Computer Having Liquid Crystal

Display Between Frames Attached

at the Edges

PRELIMINARY AMENDMENT

Asst. Commissioner for Patents Washington, D.C. 20231

Dear Sir:

11,

17

41

Prior to issuance of a first Office Action after the filing of a Rule 1.52(b) continuation application, please amend the above-referenced application as follows:

IN THE SPECIFICATION:

Please AMEND the specification as follows:

Page 2, line 19, after "sheet" (second occurrence), insert --diffuser--.

IN THE CLAIMS:

Please CANCEL Claims 2-14 without prejudice.

Please ADD new Claims 15-20 as follows:

(NEW) A liquid crystal display device mountable to a housing comprising:

a liquid crystal panel with a display area and a first plurality of side edges;

a support frame having a second plurality of side edges and supporting the liquid crystal panel, at least one side edge of the second plurality of side edges including first and second mounting holes, the first mounting hole being located at a top half of the side edge of the support

frame and the second mounting hole being located at a bottom half of the side edge of the support frame;

wherein the support frame is immovably mounted to the housing simultaneously using the first and second mounting holes at the side edge of the support frame.

16. (NEW) The liquid crystal display device according to claim 15, wherein at lessat one of the first and second mounting holes has a threaded inner surface for receiving a screw.

. (NEW)A portable computer comprising:

a liquid crystal display model having a display surface, back surface and a plurality of side edges

an upper casing substantially covering the back surface of the liquid crystal display module;

a lower casing couplet to the upper casing and having an input device;

wherein at least one side edge of the plurality of side edges including first and second mounting holes, the first mounting hole being located at a top half of the side edge of the liquid crystal display module and the second mounting hole being located at a bottom half of the side edge of the liquid crystal display module;

wherein the liquid crystal display module is immovably mounted to the upper casing using the first and second mount holes at the side edge of the liquid crystal display module.

18. (NEW) The portable computer according to claim 17, wherein at least one of the first and second mounting holes has a threaded inner surface for receiving a screw.

19. (NEW) A portable gomputer comprising:

a liquid crystal display module having a display surface, back surface and a plurality of side edges;
